

Name: Da Thao Trinh

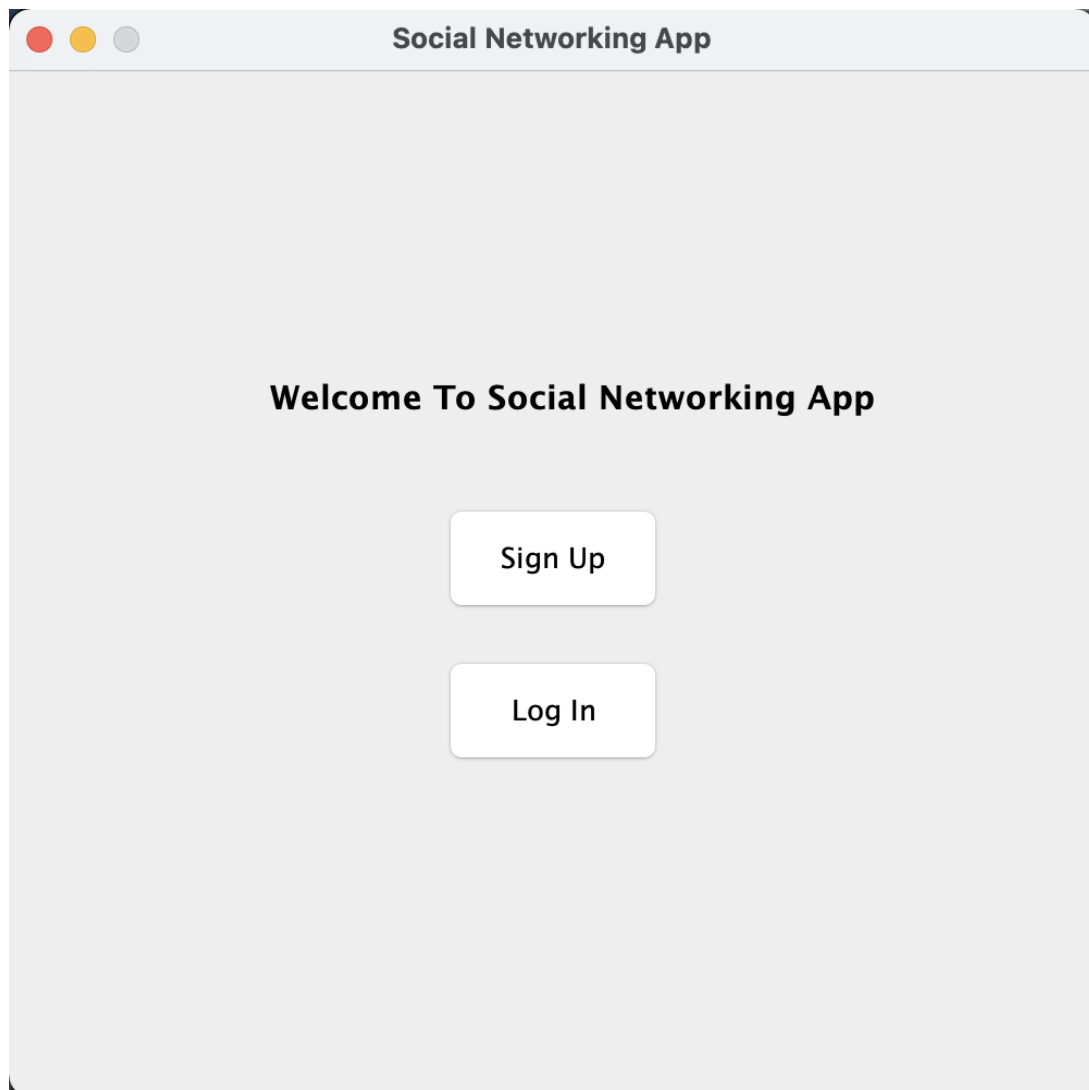

Instructions to run my application:

- There are no special instructions to run the application. However, when the application first runs, it will create a new “data.txt” file in the out/production folder.
- Every time new users sign up, their information will be stored here.

Instructions to run the jar file:

- There are no special instructions to run the jar file. However, when the jar file first runs, it will create a new “data.txt” file at the same location of the jar file.
- Every time new users sign up, their information will be stored here.
